1. **Source of Data:** Export documents collected by Canada Customs are the basic source of export statistics, except for data on electricity, crude petroleum and natural gas exported by pipeline. Electricity exports are reported by the exporting firms through the National Energy Board; crude petroleum and natural gas exported by pipeline are reported by companies directly to Statistics Canada.
2. **Timing:** Export statistics for any month include goods declared on Customs export entries received at Statistics Canada up to the last working day in the month. Exports of some motor vehicles to the U.S.A. cover a statistical month from the 26th of one month to the 25th of the following month. Reports of electricity and of pipeline exports of petroleum and gas are included in the statistics for the following month because of reporting time-lags.
3. **Coverage:**
 - a. **Domestic Exports:** Statistics of domestic exports include both goods which are wholly produced in Canada and goods previously included in import statistics which have since been changed in form by further processing and then exported.
 - b. **Re-Exports:** Statistics of re-exports include only goods previously included in import statistics which are exported from Canada in the same form as when imported. Minor operations such as sorting or blending are not considered as changing the condition of imported goods.
 - c. **Total Exports:** These statistics are the sum of a. and b. above.
 - d. **Exclusions:** The following commodity movements are excluded from export statistics (being however recorded separately as Special Transaction—Non-trade in Table 5): settlers' effects; private donations and gifts; identifiable tourist purchases; goods shipped to Canadian diplomatic or military personnel abroad or by foreign representatives in Canada; temporary exports for exhibition or competition, including films for processing. Bunker supplies and ships' stores sold to foreign vessels or aircraft in Canada, temporary exports (other than contractors' equipment shown under commodity code 970-20) and goods merely moving in transit through Canadian territory are not reflected in any of the statistics.
4. **Classification:** In this report, commodities are grouped into export summary categories, which in turn are based on the *Export Commodity Classification* (XCC). These categories are identical to those published in the monthly "Summary of External Trade" (Catalogue 65-001). A definition of each category in terms of component XCC classes is provided on page 7.
5. **Country and area of destination:** Exports are classified to the country to which they are consigned at the time the goods leave Canada, i.e. to the furthest known destination. Statistics are compiled and presented for the individual countries listed on page 4 of this report. A classification of countries with a statement of territorial limits used for statistical purposes will be found in *Merchandise Trade — Imports Cat. No. 65-203 — Exports Cat. No. 65-202*. Amendments effective in any year are listed in the January report for that year. Effective January, 1976, the "principal trading areas" shown in some tables include new groupings which are defined below:

Other E.E.C.: Belgium, Denmark, France, Germany (F.R.), Ireland, Italy, Luxembourg, Netherlands (the U.K. is also a member of the E.E.C. but is shown separately because of the importance of its trade with Canada).
1. **Source des données:** La statistique des exportations se fonde principalement sur les documents d'exportation recueillis par les Douanes canadiennes, sauf dans le cas des données sur l'électricité, le pétrole brut et le gaz naturel exportés par oléoduc. Les rapports sur les exportations d'électricité sont fournis par les entreprises exportatrices par l'intermédiaire de l'Office national d'énergie, tandis que les compagnies exportatrices de pétrole brut et de gaz naturel par oléoduc fournissent directement leurs rapports à Statistique Canada.
2. **Périodes de temps:** La statistique des exportations pour un mois quelconque comprend les marchandises déclarées dans les documents d'exportation des Douanes parvenus à Statistique Canada durant ce mois, jusqu'au dernier jour ouvrable inclus. Les exportations de certains véhicules automobiles aux États-Unis couvrent un mois fixé pour les besoins de la statistique, du 26 d'un mois au 25 du mois suivant. Les rapports sur l'électricité exportée et sur les exportations de pétrole et de gaz par oléoduc sont inclus dans la statistique pour le mois suivant à cause des retards dans ces déclarations.
3. **Couverture:**
 - a. **Exportations nationales:** La statistique des exportations nationales comprend les marchandises entièrement produites ou fabriquées au Canada de même que les marchandises précédemment comptées dans les importations et que l'on a transformées de nouveau puis exportées.
 - b. **Réexportations:** La statistique des réexportations ne comprend que les marchandises précédemment comptées dans la statistique des importations et qui sont exportées du Canada dans l'état où elles étaient lors de leur importation. Les manipulations secondaires telles que le triage ou l'assemblage ne modifient pas l'état des marchandises importées.
 - c. **Total des exportations:** Ces statistiques correspondent au total des valeurs a. et b. ci-dessus.
 - d. **Exclusions:** Les mouvements de marchandises suivants sont exclus de la statistique des exportations (ils sont toutefois classés séparément comme transactions spéciales — hors commerce dans le tableau 5): les effets d'émigrants; les dons et cadeaux privés; les achats identifiables des touristes; les marchandises expédiées aux diplomates ou militaires canadiens affectés à l'étranger ou par les diplomates étrangers au Canada; les exportations provisoires pour les expositions ou les concours, y compris les films exportés en vue de leur développement. Les approvisionnements de soute et de bord vendus aux navires et avions étrangers au Canada, les exportations provisoires (autre que le matériel des entrepreneurs, qui apparaît sous le code des produits no 970-20) et les marchandises qui séjournent temporairement en transit en territoire canadien, ne figurent dans aucune statistique.
4. **Classification:** Dans ce bulletin, les produits sont groupés en catégories de marchandises basées sur la *Classification des Marchandises à l'Exportation* (XCC). Ces catégories sont identiques à toutes celles publiées dans le rapport mensuel "Sommaire du commerce extérieur" (catalogue 65-001). Les classes XCC composant chacune de ces catégories sont présentées à la page 7 de ce bulletin.
5. **Pays et région de destination:** Les exportations sont classées selon le pays vers lequel les marchandises sont consignées au moment de leur départ du Canada, soit la destination la plus éloignée connue. Les données statistiques sont compilées et présentées pour chaque pays mentionné à la page 4 de la présente publication. Une classification des pays ainsi que l'exposé des limites territoriales employées aux fins de la statistique sont donnés dans le Commerce de marchandises — Importations no. 65-203 au cat. — Exportations no. 65-202 au cat. Les modifications apportées à une année quelconque paraissent dans le rapport de janvier de cette année-là. À partir de janvier 1976, les "marchés principaux" apparaissant dans certains tableaux comprennent les nouveaux groupements définis ci-dessous:

Autres C.E.E.: Allemagne (R.F.), Belgique, Danemark, France, Irlande, Italie, Luxembourg, Pays-Bas (le Royaume-Uni est aussi membre de la C.E.E. mais il est séparé dans les statistiques à cause de son importance dans le commerce du Canada).

Other O.E.C.D.: Austria, Finland, Greece, Iceland, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, Australia, New Zealand, (The E.E.C. countries, United States, Japan and Canada are also members of O.E.C.D. - The Organization for Economic Cooperation and Development.

Other America: This group includes all countries and territories of North and South America (other than the United States and Canada) including Greenland, Bermuda and Puerto Rico.

6. **Valuation:** Exports are recorded at the values declared on export documents, which usually reflect the actual selling price or, in the case of non-arms-length transactions, the transfer price used for company accounting purposes. Most exports are valued at the place in Canada where they are laden aboard a carrier for export (e.g. mine, farm or factory) but a significant proportion of exports by water or air reflect values which include transportation charges to the port of export. Some overland shipments to the United States are recorded at a value which includes part or all of the transportation charges to the ultimate destination because such transportation charges cannot be identified and removed.
7. **Abbreviations:** Designations of countries and commodities used in this report are often abbreviated or shortened. A key to abbreviations of countries appears on page 8 of "Exports by Commodities" (cat. no. 65-004), and comprehensive descriptions of commodities and commodity groups are shown in the "Trade of Canada Commodity Classification" (Cat. no. 12-520E), (cf. above). The letters "n.e.s." mean "not elsewhere specified".
8. **Revisions:**
 - a. **Data for current month:** Statistics for the current month (i.e. the month which is the subject of the report) in the "Preliminary Statement of Canadian Trade" and in the Summary of External Trade (65-001) have not been audited for reporting or processing errors with the exception of transactions of \$1,000,000 or more. Figures for the current month in Imports by Commodities (65-007), Exports by Commodities (65-004), Imports by Countries (65-006) and Exports by Countries (65-003) are fully audited.
 - b. **Data for previous months of the current year:** Figures for previous months of the current year remain subject to revision until the reports for December have been published. Commodity/country subtotals revised by \$10,000 or more are shown in the monthly reports 65-007 and 65-004 in the month following their application (e.g. report 65-007 for June will show data revised in May for the months January through April of the current year).
 - c. **Monthly data for previous years:** Data for any year previous to the current year are subject to revision only in March of each year. Any monthly commodity/country figures revised at that time will be shown in the March issues of reports 65-007 and 65-004.

Note: Cumulative totals in all reports reflect all revisions applied up to the date of printing.
9. **Treatment of Confidential Information:** It is occasionally necessary to withhold publication of details where commodity or country information is known to involve disclosure. The suppression of commodity-by-country detail, however, affects neither class nor country totals, which include all transactions reported during the calendar month.

Autres O.C.D.E.: Autriche, Espagne, Finlande, Grèce, Islande, Norvège, Portugal, Suède, Suisse, Turquie, Australie, Nouvelle-Zélande. (Les pays membres de la C.E.E., les Etats-Unis, le Japon et le Canada sont aussi membres de l'O.C.D.E. - l'Organisation pour la coopération et le développement économique.)

Autres Amérique: Cette catégorie comprend tous les pays et les territoires de l'Amérique du nord et du sud (sauf les Etats-Unis et le Canada), y compris le Groënland, les Bermudes et Porto Rico.

6. **Evaluation:** Les exportations sont présentées selon les valeurs déclarées dans les documents d'exportation; il s'agit habituellement du prix de vente réel ou, dans le cas des opérations entre entreprises affiliées, du prix de transfert adopté par les sociétés à des fins comptables. La plupart des exportations sont évaluées au point du territoire du Canada (mine, ferme ou usine) où elles sont chargées et ainsi confiées à un transporteur en vue de leur exportation, mais une partie importante des exportations par eau ou par air se voit attribuer une valeur qui comprend les frais de transport vers le port d'exportation. Pour certaines livraisons par voie de terre vers les Etats-Unis, la valeur indiquée comprend en partie ou en totalité les frais de transport jusqu'à la destination ultime parce qu'on ne peut isoler et retrancher ces frais.
7. **Abréviations:** Les noms des pays et des marchandises cités dans le présent rapport sont souvent abrégés ou raccourcis. L'explication des abréviations des pays est donnée à la page 9 du rapport "Exportations par marchandises" (no. 65-004 au cat.), tandis que les descriptions complètes des marchandises et des groupes de marchandises figurent dans la "Classification des marchandises pour le commerce du Canada" (No. 12-520F au cat), (mentionnée ci-dessus). Les lettres "n.d.a." signifient "non désigné ailleurs".
8. **Rectifications:**
 - a. **Données du mois courant:** Les statistiques du mois courant (c.-à-d. le mois visé dans la publication) figurant dans le "Communiqué préliminaire sur le commerce du Canada" et le Sommaire du commerce extérieur (65-001) n'ont pas été vérifiées quant aux erreurs de déclaration et de traitement, à l'exception des opérations d'au moins \$1,000,000. Les chiffres du mois courant dans Importations par marchandises (65-007), Exportations par marchandises (65-004), Importations par pays (65-006) et Exportations par pays (65-003) ont fait l'objet d'une vérification complète.
 - b. **Données des mois précédents de l'année courante:** Les chiffres des mois précédents de l'année courante demeurent sujets à révision jusqu'à la parution des publications pour décembre. Les totaux rectifiés par \$10,000 ou plus au niveau de marchandise/pays figurent dans les publications mensuelles 65-007 et 65-004 du mois qui suit leur application (par ex., le numéro de juin de la publication 65-007 présentera les données qui ont été rectifiées en mai pour les mois de janvier à avril de l'année courante).
 - c. **Données mensuelles des années précédentes:** Les données pour toute année antérieure à l'année courante sont sujettes à révision seulement en mars de chaque année. Les chiffres mensuels par marchandise/pays qui seront rectifiés à ce moment-là paraîtront dans les éditions de mars des publications 65-007 et 65-004.

Note: Les totaux cumulatifs figurant dans toutes les publications prennent en compte toutes les rectifications apportées jusqu'à la date d'impression.
9. **Renseignements confidentiels:** Il est parfois nécessaire de supprimer le détail des données relativement à certaines marchandises ou à certains pays pour protéger le caractère confidentiel de données individuelles. La suppression du détail des marchandises par pays ne modifie toutefois pas les totaux par catégorie, ou groupe de pays qui comprennent toutes les opérations dont il a été fait rapport au cours du mois civil.

1. **Source of Data:** Export documents collected by Canada Customs are the basic source of export statistics, except for data on electricity, crude petroleum and natural gas exported by pipeline. Electricity exports are reported by the exporting firms through the National Energy Board; crude petroleum and natural gas exported by pipeline are reported by companies directly to Statistics Canada.
2. **Timing:** Export statistics for any month include goods declared on Customs export entries received at Statistics Canada up to the last working day in the month. Exports of some motor vehicles to the U.S.A. cover a statistical month from the 26th of one month to the 25th of the following month. Reports of electricity and of pipeline exports of petroleum and gas are included in the statistics for the following month because of reporting time-lags.
3. **Coverage:**
 - a. **Domestic Exports:** Statistics of domestic exports include both goods which are wholly produced in Canada and goods previously included in import statistics which have since been changed in form by further processing and then exported.
 - b. **Re-Exports:** Statistics of re-exports include only goods previously included in import statistics which are exported from Canada in the same form as when imported. Minor operations such as sorting or blending are not considered as changing the condition of imported goods.
 - c. **Total Exports:** These statistics are the sum of a. and b. above.
 - d. **Exclusions:** The following commodity movements are excluded from export statistics (being however recorded separately as Special Transaction—Non-trade in Table 5): settlers' effects; private donations and gifts; identifiable tourist purchases; goods shipped to Canadian diplomatic or military personnel abroad or by foreign representatives in Canada; temporary exports for exhibition or competition, including films for processing. Bunker supplies and ships' stores sold to foreign vessels or aircraft in Canada, temporary exports (other than contractors' equipment shown under commodity code 970-20) and goods merely moving in transit through Canadian territory are not reflected in any of the statistics.
4. **Classification:** In this report, commodities are grouped into export summary categories, which in turn are based on the *Export Commodity Classification* (XCC). These categories are identical to those published in the monthly "Summary of External Trade" (Catalogue 65-001). A definition of each category in terms of component XCC classes is provided on page 7.
5. **Country and area of destination:** Exports are classified to the country to which they are consigned at the time the goods leave Canada, i.e. to the furthest known destination. Statistics are compiled and presented for the individual countries listed on page 4 of this report. A classification of countries with a statement of territorial limits used for statistical purposes will be found in *Merchandise Trade — Imports Cat. No. 65-203 — Exports Cat. No. 65-202*. Amendments effective in any year are listed in the January report for that year. Effective January, 1976, the "principal trading areas" shown in some tables include new groupings which are defined below:

Other E.E.C.: Belgium, Denmark, France, Germany (F.R.), Ireland, Italy, Luxembourg, Netherlands (the U.K. is also a member of the E.E.C. but is shown separately because of the importance of its trade with Canada).
1. **Source des données:** La statistique des exportations se fonde principalement sur les documents d'exportation recueillis par les Douanes canadiennes, sauf dans le cas des données sur l'électricité, le pétrole brut et le gaz naturel exportés par oléoduc. Les rapports sur les exportations d'électricité sont fournis par les entreprises exportatrices par l'intermédiaire de l'Office national d'énergie, tandis que les compagnies exportatrices de pétrole brut et de gaz naturel par oléoduc fournissent directement leurs rapports à Statistique Canada.
2. **Périodes de temps:** La statistique des exportations pour un mois quelconque comprend les marchandises déclarées dans les documents d'exportation des Douanes parvenus à Statistique Canada durant ce mois, jusqu'au dernier jour ouvrable inclus. Les exportations de certains véhicules automobiles aux États-Unis couvrent un mois fixé pour les besoins de la statistique, du 26 d'un mois au 25 du mois suivant. Les rapports sur l'électricité exportée et sur les exportations de pétrole et de gaz par oléoduc sont inclus dans la statistique pour le mois suivant à cause des retards dans ces déclarations.
3. **Couverture:**
 - a. **Exportations nationales:** La statistique des exportations nationales comprend les marchandises entièrement produites ou fabriquées au Canada de même que les marchandises précédemment comptées dans les importations et que l'on a transformées de nouveau puis exportées.
 - b. **Réexportations:** La statistique des réexportations ne comprend que les marchandises précédemment comptées dans la statistique des importations et qui sont exportées du Canada dans l'état où elles étaient lors de leur importation. Les manipulations secondaires telles que le triage ou l'assemblage ne modifient pas l'état des marchandises importées.
 - c. **Total des exportations:** Ces statistiques correspondent au total des valeurs a. et b. ci-dessus.
 - d. **Exclusions:** Les mouvements de marchandises suivants sont exclus de la statistique des exportations (ils sont toutefois classés séparément comme transactions spéciales — hors commerce dans le tableau 5): les effets d'émigrants; les dons et cadeaux privés; les achats identifiables des touristes; les marchandises expédiées aux diplomates ou militaires canadiens affectés à l'étranger ou par les diplomates étrangers au Canada; les exportations provisoires pour les expositions ou les concours, y compris les films exportés en vue de leur développement. Les approvisionnements de soute et de bord vendus aux navires et avions étrangers au Canada, les exportations provisoires (autre que le matériel des entrepreneurs, qui apparaît sous le code des produits no 970-20) et les marchandises qui séjournent temporairement en transit en territoire canadien, ne figurent dans aucune statistique.
4. **Classification:** Dans ce bulletin, les produits sont groupés en catégories de marchandises basées sur la *Classification des Marchandises à l'Exportation* (XCC). Ces catégories sont identiques à toutes celles publiées dans le rapport mensuel "Sommaire du commerce extérieur" (catalogue 65-001). Les classes XCC composant chacune de ces catégories sont présentées à la page 7 de ce bulletin.
5. **Pays et région de destination:** Les exportations sont classées selon le pays vers lequel les marchandises sont consignées au moment de leur départ du Canada, soit la destination la plus éloignée connue. Les données statistiques sont compilées et présentées pour chaque pays mentionné à la page 4 de la présente publication. Une classification des pays ainsi que l'exposé des limites territoriales employées aux fins de la statistique sont donnés dans le *Commerce de marchandises — Importations no. 65-203 au cat. — Exportations no. 65-202 au cat.* Les modifications apportées à une année quelconque paraissent dans le rapport de janvier de cette année-là. À partir de janvier 1976, les "marchés principaux" apparaissant dans certains tableaux comprennent les nouveaux groupements définis ci-dessous:

Autres C.E.E.: Allemagne (R.F.), Belgique, Danemark, France, Irlande, Italie, Luxembourg, Pays-Bas (le Royaume-Uni est aussi membre de la C.E.E. mais il est séparé dans les statistiques à cause de son importance dans le commerce du Canada).

Other O.E.C.D.: Austria, Finland, Greece, Iceland, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, Australia, New Zealand, (The E.E.C. countries, United States, Japan and Canada are also members of O.E.C.D. — The Organization for Economic Cooperation and Development.

Other America: This group includes all countries and territories of North and South America (other than the United States and Canada) including Greenland, Bermuda and Puerto Rico.

Autres O.C.D.E.: Autriche, Espagne, Finlande, Grèce, Islande, Norvège, Portugal, Suède, Suisse, Turquie, Australie, Nouvelle-Zélande. (Les pays membres de la C.E.E., les États-Unis, le Japon et le Canada sont aussi membres de l'O.C.D.E. — l'Organisation pour la coopération et le développement économique.)

Autres Amérique: Cette catégorie comprend tous les pays et les territoires de l'Amérique du nord et du sud (sauf les États-Unis et le Canada), y compris le Groënland, les Bermudes et Porto Rico.

6. **Valuation:** Exports are recorded at the values declared on export documents, which usually reflect the actual selling price or, in the case of non-arms-length transactions, the transfer price used for company accounting purposes. Most exports are valued at the place in Canada where they are laden aboard a carrier for export (e.g. mine, farm or factory) but a significant proportion of exports by water or air reflect values which include transportation charges to the port of export. Some overland shipments to the United States are recorded at a value which includes part or all of the transportation charges to the ultimate destination because such transportation charges cannot be identified and removed.

7. **Abbreviations:** Designations of countries and commodities used in this report are often abbreviated or shortened. A key to abbreviations of countries appears on page 8 of "Exports by Commodities" (cat. no. 65-004), and comprehensive descriptions of commodities and commodity groups are shown in the "Trade of Canada Commodity Classification" (Cat. no. 12-520E), (cf. above). The letters "n.e.s." mean "not elsewhere specified".

8 Revisions:

a. **Data for current month:** Statistics for the current month (i.e. the month which is the subject of the report) in the "Preliminary Statement of Canadian Trade" and in the Summary of External Trade (65-001) have not been audited for reporting or processing errors with the exception of transactions of \$1,000,000 or more. Figures for the current month in Imports by Commodities (65-007), Exports by Commodities (65-004), Imports by Countries (65-006) and Exports by Countries (65-003) are fully audited.

b. **Data for previous months of the current year:** Figures for previous months of the current year remain subject to revision until the reports for December have been published. Commodity/country subtotals revised by \$10,000 or more are shown in the monthly reports 65-007 and 65-004 in the month following their application (e.g. report 65-007 for June will show data revised in May for the months January through April of the current year).

c. **Monthly data for previous years:** Data for any year previous to the current year are subject to revision only in March of each year. Any monthly commodity/country figures revised at that time will be shown in the March issues of reports 65-007 and 65-004.

Note: Cumulative totals in all reports reflect all revisions applied up to the date of printing.

9. **Treatment of Confidential Information:** It is occasionally necessary to withhold publication of details where commodity or country information is known to involve disclosure. The suppression of commodity-by-country detail, however, affects neither class nor country totals, which include all transactions reported during the calendar month.

6. **Evaluation:** Les exportations sont présentées selon les valeurs déclarées dans les documents d'exportation; il s'agit habituellement du prix de vente réel ou, dans le cas des opérations entre entreprises affiliées, du prix de transfert adopté par les sociétés à des fins comptables. La plupart des exportations sont évaluées au point du territoire du Canada (mine, ferme ou usine) où elles sont chargées et ainsi confiées à un transporteur en vue de leur exportation, mais une partie importante des exportations par eau ou par air se voit attribuer une valeur qui comprend les frais de transport vers le port d'exportation. Pour certaines livraisons par voie de terre vers les États-Unis, la valeur indiquée comprend en partie ou en totalité les frais de transport jusqu'à la destination ultime parce qu'on ne peut isoler et retrancher ces frais.

7. **Abréviations:** Les noms des pays et des marchandises cités dans le présent rapport sont souvent abrégés ou raccourcis. L'explication des abréviations des pays est donnée à la page 9 du rapport "Exportations par marchandises" (no. 65-004 au cat.), tandis que les descriptions complètes des marchandises et des groupes de marchandises figurent dans la "Classification des marchandises pour le commerce du Canada" (No. 12-520F au cat), (mentionnée ci-dessus). Les lettres "n.d.a." signifient "non désigné ailleurs".

8. Rectifications:

a. **Données du mois courant:** Les statistiques du mois courant (c.-à-d. le mois visé dans la publication) figurant dans le "Communiqué préliminaire sur le commerce du Canada" et le Sommaire du commerce extérieur (65-001) n'ont pas été vérifiées quant aux erreurs de déclaration et de traitement, à l'exception des opérations d'au moins \$1,000,000. Les chiffres du mois courant dans Importations par marchandises (65-007), Exportations par marchandises (65-004), Importations par pays (65-006) et Exportations par pays (65-003) ont fait l'objet d'une vérification complète.

b. **Données des mois précédents de l'année courante:** Les chiffres des mois précédents de l'année courante demeurent sujets à révision jusqu'à la parution des publications pour décembre. Les totaux rectifiés par \$10,000 ou plus au niveau de marchandise/pays figurent dans les publications mensuelles 65-007 et 65-004 du mois qui suit leur application (par ex., le numéro de juin de la publication 65-007 présentera les données qui ont été rectifiées en mai pour les mois de janvier à avril de l'année courante).

c. **Données mensuelles des années précédentes:** Les données pour toute année antérieure à l'année courante sont sujettes à révision seulement en mars de chaque année. Les chiffres mensuels par marchandise/pays qui seront rectifiés à ce moment-là paraîtront dans les éditions de mars des publications 65-007 et 65-004.

Note: Les totaux cumulatifs figurant dans toutes les publications prennent en compte toutes les rectifications apportées jusqu'à la date d'impression.

9. **Renseignements confidentiels:** Il est parfois nécessaire de supprimer le détail des données relativement à certaines marchandises ou à certains pays pour protéger le caractère confidentiel de données individuelles. La suppression du détail des marchandises par pays ne modifie toutefois pas les totaux par catégorie, ou groupe de pays qui comprennent toutes les opérations dont il a été fait rapport au cours du mois civil.
